You Will Learn . . .
This conference will provide you with an overview of today’s asphalt materials and will examine the multiple types and usages of hot mix asphalt, including mix evaluation, mix selection guidelines and perpetual HMA pavements. Additionally, presentations on performance testing, subgrade improvement, and new equipment technologies will be provided. Highlights of current flexible pavement research efforts in Wisconsin as well as success stories from the ongoing quality management process will be presented.

Who Should Attend?
This conference will assist state, county, city and town highway officials and maintenance personnel, engineers, architects, contractors’ personnel and material and equipment suppliers in the performance of their jobs.

Program Committee
Mark Blev, Asphalt Institute
Tom Brokaw, Wisconsin Department of Transportation
Jim Crovetti, Marquette University
Wes Shannon, Federal Highway Administration
Rick Schmidt, Payne & Dolan, Inc.
Scott Schwandt, Wisconsin Asphalt Pavement Association, Inc.
Jerry Zaremba, City of Milwaukee

8:00 A.M. Registration - Coffee & Rolls
8:30 A.M. Welcome Address
Stan Jaskolski – Dean, College of Engineering, Marquette University
9:00 A.M. HMA Mixture Evaluation & Selection Guidelines
WAPA/DOT Technical Team Representatives
9:45 A.M. Application of Latest Asphalt Testing Technology in Wisconsin
Chuck Paugh – Senior Project Manager, FHWA
10:15 A.M. REFRESHMENT BREAK
10:45 A.M. WisDOT Subgrade Improvement: Current Options and Initiatives
Bruce Pfister – Chief Geotechnical Engineer, WisDOT
WisDOT Pavilion
11:30 A.M. The Marquette Interchange — A Perpetual Pavement
Rick Schmidt – Vice President, Payne & Dolan, Inc.
12:00 P.M. LUNCH
1:00 P.M. QMP: Revolutionary to Evolutionary
Judie Ryan – Asphalt Mixtures Specialist, WisDOT BHC
1:30 P.M. WHRP/WisDOT Pavement Research Overview
Peter Bosscher – Program Manager, Wisconsin Highway Research Program
2:00 P.M. New Equipment Technologies
Dave Strassman – Vice President, Asphalt Reheat Systems
Bob Schmidt – Assistant Professor, UW-Platteville
2:30 P.M. Adjourn

November 17, 2004 ◆ Country Inn Hotel & Conference Center ◆ Waukesha, WI
The Federal Highway Administration (FHWA), in cooperation with the States, administers programs vital to maintaining the integrity and safety of our Nation's roads and highways by carrying out the requirements of highway legislation; working cooperatively with public and private partners to advance technology; delivering technical training and assistance; promoting use of the best available safety practices and technologies; and ensuring full accounting of the impacts of highway activities on the human and natural environment.

The Federal Highway Administration is a division of the Department of Transportation (DOT).
