You Will Learn . . .

At this seminar you will learn about innovative equipment and analysis tools applicable for the construction of quality concrete pavements. You will also learn about non-traditional paving applications including pervious concrete and whitetopping of parking lots. You will also have an opportunity to interact with panel members during the afternoon workshops on residential paving and stamped and colored concrete.

Who Should Attend?

This seminar will assist state, county, city and town highway officials and maintenance personnel, engineers, architects, contractors' personnel, and material and equipment suppliers in the performance of their jobs.
